Revered Babuji Maharaj

Whispers from The Brighter World

Monday, November 8, 1999 – 8:00 a.m.

Life is One, God is life, which is in everything. It animates your body, all that moves around you, all that breathes and exists.

He is in each cell of your being; everything created has His mark, from the infinitely small to the infinitely big. Open your eyes, you will all see Him everywhere and in everything.

The entire creation is vibrant with Him. His omnipresence is one of the aspects of His manifestation.

Humans create nothing, invent nothing; they are in complete illusion with regard to that. Divine creation is in perpetual change, because it is movement, action, evolution, involution.

All this is abstract, and being incarnate, you will never be able to penetrate all its mysteries and resources – they are innumerable. Each of your breaths gives rhythm to what is transforming itself in you and around you.

It is eternal renewal, total shift, uncontrollable by human beings and even undetectable by them in certain areas, where those who think they know everything – or even the most enlightened seeker – cannot have access to this stage of evolution on Earth.
