Whispers from The Brighter World

Sunday, June 5, 2016 – 10:00 a.m.

Relax, let your heart express itself – it does it so well. Many brothers and sisters follow you on this journey of messages that help them in everyday life. Love is the very essence of it; what would a life be without this redeeming energy that transforms beings through this long course of incarnations! All incarnations have their own purpose, each one being a link in the chain that constitutes this Karma, so secret to human beings that they cannot go deeply into the reasons behind it. Why all these trials, sufferings – joys too, though they often do not last long. The only real purpose of a life is the evolution of the being, in the best that it has – spirituality, so necessary for one's personal elevation. Still, one has to become aware of this and, above all, make sure to follow up. Until the end of one's life, a human being is given the opportunity to grow, to progress towards the source – that source where the beings in need, having become aware of their real nature, quench their thirst for this necessary and decisive progress on their journey.

Brother and sister abhyasis are making great strides, by joining us they save precious time. Everything is counted and recorded on the ledger of time. Karmic laws are extremely rigorous, nothing happens without reason. Accepting one's life is the best option for not weighing it down any further.

*The best to all, under our blessings.*
